Sponsor Information Sheet

Thank you so much for making a difference!

Sponsoring a runner helps rescue babies in extreme need at our Tessa Grace Nutrition Center in Mozambique, Africa.

$25 provides life-giving formula for 1 baby for a month.
$40 provides medical care, nutritional supplements, training and rice.

Multiply that and in a year that baby has been turned from death to life.

$300 for milk /$480 for full care.

Every dollar makes a difference—and it all adds up!

The runner who raises the highest amount will receive a prize valued at a minimum of $300, courtesy of Amici's Hair Studio. Our way of saying thank you for caring.

Two ways to Donate:

- By check payable to: Children's Relief International, or CRI for short. In the memo line write: Run for a Life 5k
- Make a cash donation

Then:

- Write your information, payment method and amount CLEARLY on the Sponsor Form. *YOUR DONATION IS TAX DEDUCTIBLE*. Donations of $250 and over will automatically receive a year-end receipt. All other donations receive receipts upon request to finance@childrensrelief.org
- Runners will hand in the money during registration time on the day of the event (October 17th, 2014).

    We hope that you will be there to cheer the runners on!

For More Information:

* Please note that the amounts listed are indicators of our cost as we care for the babies and their families. Donations are pooled to provide for whatever care the babies need to grow healthy and strong. When they are old enough to eat regular food (around age 2), and are viable for life they graduate and more babies who need our help are added to the program. The criteria for being added to our program is that there is no other way the baby would live.
